Subject: NCBA and PLC submit comments in support of rescinding the 2015 WOTUS Rule
[NCBA-PLC 2015 WOTUS Repeal Comments.pdf](#)

Administrator Pruitt et al,

I am submitting the attached comments in support of the proposal to rescind the 2015 “waters of the United States” rule on behalf of the National Cattlemen’s Beef Association and the Public Lands Council. I have also submitted these comments to the docket on regulations.gov. Thank you for your time and consideration of this important issue.

Subject: RE: Interested in attending smart sectors tomorrow

Hi Scott – you and your CEO (Kendal Frazier, correct?) are welcome to attend. Below is the latest event information.

Good Morning – we are very much looking forward to seeing you all at the Smart Sector Launch event tomorrow at 2:00PM at EPA Headquarters. Due to recent events, Administrator Pruitt's schedule is in flux at this time. In the event that he is unable to attend, Samantha Dravis, Associate Administrator for the Office of Policy, and Henry Darwin, Chief of Operations will host in his place.

I apologize for any inconvenience this may cause but look forward to hosting you tomorrow and to a robust dialogue.

Best,

Daisy

All –

On behalf of U.S. Environmental Protection Agency (EPA) Administrator Scott Pruitt, I am pleased to have you in attendance for the launch of the Smart Sectors Program on Tuesday, October 3, 2017 at 2:00PM.

Below you will find additional details about the event. Please do not hesitate to reach out should you have any questions or concerns. We look forward to seeing you.

Best,

Daisy C. Letendre

Senior Advisor for Policy and Strategic Communications

Office of the Administrator

Office of Policy

(202) 603-6231

EPA Smart Sectors Launch Event

Who:

U.S. EPA Administrator Scott Pruitt welcomes CEOs and leadership from 30+ trade associations and their member companies.

What:

Administrator Pruitt will announce the launch of Smart Sectors, a voluntary partnership program at EPA that enables better communication with regulated sectors in order to develop sensible forward-looking approaches to deliver EPA's mission. The Administrator will give remarks, and there will be an opportunity for brief introductions and Q&A. This event is closed press.

When:

Tuesday, October 3, 2017 at 2:00PM

Doors Open 1:30PM, please arrive no later than 1:50PM

Where:

EPA Headquarters

Rachel Carson Green Room

William Jefferson Clinton North Building

1200 Pennsylvania Avenue, NW

Washington, D.C. 20460

**See attached flier for directions to EPA Headquarters*

Security Note:

If you are receiving this email, your name will be included on a list at the north entrance security guard station to expedite entry. Please bring a photo ID. Someone will be on hand to escort you to the Rachel Carson Green Room. If there are additional people attending with you who did not receive this email, please send me their names and titles to ensure they are included on the list.

Administrator Scott Pruitt Statement on President Trump's Tax Reform Proposal

.....

WASHINGTON (August 30, 2017) -- U.S. Environmental Protection Agency (EPA)
Administrator Scott Pruitt today released the following statement on President Trump's
tax reform proposal:

"President Trump is leading the fight for tax reform that will benefit all Americans. At
EPA, we have worked to promote regulatory certainty that will help create jobs and
produce a cleaner environment. This goes hand in hand with the President's plan to

create a tax system that will provide clarity and restore fairness for a more prosperous America."

Subject: RE: Frasier Ranch visit
Attachments: Frasier Ranch DRAFT_7-26-17.docx

Tate, please disregard the last email and attachment. I'm attaching the updated version here and pasting below. -Scott

Overview:

Date: Wednesday, August 2, 2017
Time of arrival: 10:00am Mountain time
Venue: Frasier Ranch - cow/calf and stocker operation
Street Address: 5727 Hwy 71, Woodrow, CO, 80757
Owner: Mark Frasier
Audience: 20-30 attendees (estimated)

- Agricultural stakeholders – ranchers, feedlot operators, dairies, farmers
- Members of Congress and/or staff
- County Commissioners

Background: He had EPA visit his ranch in 2015 during the WOTUS rollout when they promised it wouldn't impact agriculture and we know how that turned out. It will be great for the Administrator to do a repeat here except he's actually providing relief to Rural America.

Timeline:

10:00am: Introductions and gather at the hay barn
10:15am: Conversation between EPA and ag stakeholders
11:00pm: Tour of Frasier Ranch –

- Stock ponds
- Grazing cattle
- Stocker cattle

12:00pm: Lunch back at the homestead (table at the barn with cold cut sandwiches, chips, drinks)
1:00pm: Goodbyes and departure

Dress code: Dress for outdoor ranch tour – Jeans, boots, button-down shirt

Attachments: Frasier Ranch visit_7-26-17.docx

Tate,

Attached is the draft line-by-line for the Administrator's visit to Frasier Ranch on August 2. Let me know if you need anything else. I'm also pasting it below, for your convenience.

Overview:

Date: Wednesday, August 2, 2017

Time of arrival: 10:00am Mountain time

Venue: Frasier Ranch - cow/calf and stocker operation

Street Address: 5727 Hwy 71, Woodrow, CO, 80757

Owner: Mark Frasier

Audience: Agricultural stakeholders – ranchers, feedlot operators, farmers

Background: He had EPA visit his ranch in 2015 during the WOTUS rollout when they promised it wouldn't impact agriculture and we know how that turned out. It will be great for the Administrator to do a repeat here except he's actually providing relief to Rural America.

Timeline:

11:00am: introductions and gather at the hay barn

11:15am: Conversation between EPA and ag stakeholders

12:00pm: Tour of Frasier Ranch –

- Stock ponds
- Grazing cattle
- Stocker cattle

1:00pm: Lunch back at the homestead

2:00pm: Goodbyes and departure

Dress code: Dress for outdoor ranch tour – Jeans, boots, button-down shirt

Scott Yager

Subject: Additional Fuel Waivers Issued, and other comments

Below is the latest from EPA. In sum, EPA Administrator Scott Pruitt yesterday was on the ground in Texas assessing existing and potential environmental damage caused by Harvey, has approved additional emergency fuel waivers, has deployed staff on the ground near a chemical facility and finally has issued a joint statement with Texas DEQ. Let me know if you have any questions.

EPA Approves Emergency Fuel Waivers for 38 States and Washington, D.C.

WASHINGTON (August 31, 2017) – As a result of the continuing impacts on Gulf Coast-area refineries and disruption to the fuel distribution system caused by Hurricane Harvey, U.S. Environmental Protection Agency (EPA) Administrator Scott Pruitt today exercised EPA's emergency fuel waiver authority to help ensure an adequate supply of fuel throughout the country.

EPA has waived requirements for reformulated gasoline and low volatility conventional gasoline through September 15 in the following states and the District of Columbia: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont, Delaware, the District of Columbia, Maryland, New Jersey, New York, Pennsylvania, Florida, Georgia, North Carolina, South Carolina, Virginia, West Virginia, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, South Dakota, Ohio, Oklahoma, Tennessee, Wisconsin, Alabama, Arkansas, Louisiana, Mississippi, New Mexico, and Texas. Today's waiver supersedes and expands the areas covered by the waiver issued on August 30. The sale of gasoline containing up to 15 percent ethanol (E15) must continue to comply with federal rules, which are designed to minimize the potential for E15 being used in vehicles that are not designed to use this fuel.

The waiver authority was exercised under the Clean Air Act and was granted by EPA Administrator Pruitt, in coordination with the U.S. Secretary of Energy Rick Perry.

As required by law, EPA and the Department of Energy (DOE) evaluated the situation and determined that granting a short-term waiver was consistent with the public interest. EPA and DOE are continuing to actively monitor the fuel supply situation as a result of Hurricane Harvey, and will act expeditiously if extreme and unusual supply circumstances exist in other areas.

To mitigate any impacts on air quality, the Clean Air Act provides strict criteria for when fuels waivers may be granted, and requires that waivers be limited as much as possible in terms of their geographic scope and duration.

EPA Statement on Reported Explosion at Chemical Plant in Crosby, Texas

WASHINGTON (August 31, 2017) – U.S. Environmental Protection Agency (EPA) Administrator Scott Pruitt released the following statement on the report of an explosion at an Arkema facility in Crosby, Texas that occurred in the aftermath of Hurricane Harvey:

"EPA's focus is on the safety of those around the facility and we urge those in the area to follow the safety instructions of local authorities. EPA is providing assistance and resources to the first responders in Harris County and the Federal Emergency Management Agency (FEMA).

"EPA has emergency response personnel on the scene and the Agency is currently reviewing data received from an aircraft that surveyed the scene early this morning. This information indicates that there are no concentrations of concern for toxic materials reported at this time.

"We will consider using any authority we have to further address the situation to protect human health and the environment."

Additional Background:

At approximately 2:45 a.m. CT this morning the National Response Center received a report from Arkema concerning a reported explosion at their facility in Crosby, Texas.

As described in the National Contingency Plan (a federal regulation under the CERCLA statute), EPA is required to prepare for and respond to any release or threat of release of oil, hazardous substances, pollutants, or contaminants into the environment that may present an imminent and substantial threat to public health or welfare and the environment.

As a result, EPA has deployed an ASPECT aircraft to secure chemical information from the smoke cloud and EPA's federal on-scene coordinator will arrive shortly to ensure all federal resources are available to first responders. EPA is also sending additional air monitoring personnel and equipment to augment the current efforts of the state and local first responders, and monitoring teams from Houston will arrive on-scene in the next few hours.

EPA provides the Co-Chair of the Region 6 standing Regional Response Team, a group federal agencies that support a response, and provides pre-designated On-Scene Coordinators for the inland zone. The Coast Guard is the other Co-Chair. EPA is responsible for providing expertise regarding ecological and environmental effects of pollution releases and environmental pollution control techniques

There is a 1.5-mile radius exclusion area around the explosion site and EPA personnel are getting as close to the scene as possible. Currently, a zone has been set by the local fire marshal to protect the area from potential additional explosions.

EPA/TCEQ Statement on Water Quality of Flood-Impacted Areas from Hurricane Harvey

WASHINGTON (August 31, 2017) – The U.S. Environmental Protection Agency (EPA) and The Texas Commission on Environmental Quality (TCEQ) release the following statement today, in regards to the water quality of flood-impacted areas from Hurricane Harvey.

"EPA and TCEQ are aware that releases of wastewater from sanitary sewers occur during major flood events. The Agencies actively work to monitor those facilities that have reported spills, as well as conducting outreach and providing technical guidance to all other wastewater facilities in flood-impacted areas.

"Floodwaters may contain many hazards, including bacteria and other disease agents. Precautions should be taken by anyone involved in cleanup activities or any others who may be exposed to flood waters. These precautions include heeding all warnings from local and state authorities regarding boil water notices, swimming advisories, or other safety advisories. In addition to the drowning hazards of wading, swimming, or driving in swift floodwaters, these waters can carry large objects that are not always readily visible that can cause injuries to those in the water. Other potential hazards include downed power lines and possible injuries

inflicted by animals displaced by the floodwaters.

“Federal and state mobile command is currently about 200 people, who are working elbow-to-elbow, starting in Corpus Christi and moving east with primary responsibility of the health and safety of those affected by Hurricane Harvey. As we continue to respond to this natural disaster and its devastating effects on the people of Texas, the biggest threat to public health at this time is ensuring they have access to safe drinking water and ensuring waste water systems are being monitored, tested for safety and managed appropriately.”

EPA PREPARES FOR HURRICANE IRMA

Regions 2 and 4 Taking Precautions, Activating Emergency Response Teams

WASHINGTON - EPA's organized, emergency response program is preparing for Hurricane Irma, while continuing response efforts around the devastating flooding effects of Hurricane Harvey. Irma, expected to hit Southern Florida, Puerto Rico and the U.S. Virgin Islands, is expected to be a fast-moving storm, with dangerous winds that could cause widespread power outages and damage to property across multiple states and territories of the U.S. While Harvey has been unique in its extreme flooding, Irma's high winds could result in downed powerlines, complicating the ability to pump water through drinking and waste water systems, especially in Puerto Rico.

"After seeing the expert preparedness and ongoing response efforts of our team in Region 6, I am confident that Region 4 and Region 2 can replicate their efforts, as we work together to provide the needed support to local, state and federal agencies around Hurricane Irma," **said EPA Administrator Scott Pruitt.**

EPA headquarters emergency operations center, EPA Region 2 and EPA Region 4 are monitoring the storm closely and making preparations to activate in order to support the U.S. Coast Guard, the Federal Emergency Management Agency and state environmental agencies, to quickly provide support to people affected by the storm.

EPA's Regional office in Atlanta is taking precautions, including: reviewing inventory of, and understanding all sites of interest, in particular Superfund sites in Southern Florida. Initial assessment has approximately 22 current or former National Priorities List (NPL) sites within Florida's southernmost 100 miles. Region 4 is taking necessary actions to shore up these sites appropriately, work with parties responsible for their ongoing cleanups, and ensure that staff in the area are safe.

The Region is also reviewing information about drinking and waste water systems in the potentially affected areas, so that personnel in the field can be best prepared to quickly respond, post storm. EPA staff have been deployed to FEMA's Regional Response Coordination Center, as well as the State of Florida Emergency Operations Center. Region 4 also has additional staff standing by, ready to support state and federal partners if called upon.

With regard to the Mississippi phosphates Superfund site, located in Pascagoula, Mississippi, EPA is taking necessary actions to ensure the treatment plant remains operational during the storm. EPA assumed oversight of the site in February.

"We have been reaching out to all our regional and state agency contacts and I have extreme confidence in our emergency response managers," **said EPA Regional Administrator of Region 4 Trey Glenn.** "As always we stand with our states and FEMA, ready to identify at-risk locations prior to the hurricane, and will be ready to assess

damage quickly after landfall.” Region 4 serves: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, and six Tribes.

EPA has identified and conducted initial assessments at approximately 23 Superfund and oil sites in Puerto Rico and U.S. Virgin Islands. In advance of Irma, Region 2 has reached out to all the responsible entities, whether they be our contractors for fund-lead projects or PRPs, for NPL sites, active removal actions and oil response actions, with regard to preparing for the storm. Region 2 serves: New Jersey, New York, Puerto Rico, the U.S. Virgin Islands and eight tribal nations.

“Our biggest health and environmental concerns in Puerto Rico and the U.S. Virgin Islands are potential oil spills and the potential impacts of power disruptions on water supply systems,” said **Acting Regional Administrator Catherine McCabe**. “Region 2 is working with managers of Superfund sites and other facilities that may contain oil or hazardous materials to ensure appropriate precautions have been taken to prevent spills. We are doing our best to prepare and support our citizens in Puerto Rico.”

Region 2 is coordinating with other federal agencies, like FEMA and the U.S. Coast Guard, and local governments in the U.S. Virgin Islands and Puerto Rico. EPA has staff set up at the regional response center in Edison, N.J. and the FEMA response center in Colts Neck, N.J. The Region is ready to deploy additional assets to the islands.

As an Agency, EPA supports hurricane preparedness and response in a number of ways, including:

- ※ **Addressing Fuel Shortages:** The Clean Air Act allows EPA Administrator Pruitt, in consultation with Energy Secretary Perry, to waive certain fuel requirements to address shortages that occur as a result of the storm. If Administrator Pruitt determines that extreme and unusual fuel supply circumstances exist in a state or region as a result of a hurricane, a temporary waiver can help ensure an adequate supply of gasoline is available in the affected area, particularly for emergency vehicles. EPA has an experienced team standing by to expedite handling of any fuel waiver requests by the states or commonwealth.
- ※ **Monitoring Public Water Systems:** Water systems can be severely impacted during hurricanes due to storm surge, flooding, or loss of power from extreme winds. EPA has a tracking system to identify systems in the storm’s pathway. Following the storm, and if the state requests federal assistance, EPA conducts damage assessments of both drinking water and wastewater systems to identify impacts to critical assets and assist in the recovery.
- ※ **Securing Superfund Sites:** EPA assesses conditions at the NPL Superfund sites in the storm’s pathway and tasks each Superfund National Priorities List (NPL) remedial site manager to assess conditions and make on-site preparations for high winds and potentially heavy rainfall. Following the storm and receding floodwaters, EPA conducts rapid assessments to identify damage at sites and initiate cleanup plans if necessary. Any on-site activities at sites located in the storm’s path are ceased until

the all clear is given and on-site equipment is secured. In addition, freeboard for lagoons or ponds is increased to accommodate forecasted rainfall if possible. After a hurricane makes landfall and any flooding recedes, the EPA remedial managers will conduct assessments of each Superfund NPL site to ensure no damage has occurred.

- **Assessing Conditions at Major Industrial Facilities:** EPA assesses conditions at the major industrial facilities in the storm's pathway to identify potential impacts and countermeasures. Following the storm and receding floodwaters, spills and releases are reported to the National Response Center. NRC notifies the U.S. Coast Guard or EPA based on preapproved jurisdiction boundaries. EPA conducts follow up inspections and damage assessments in response to reports within EPA jurisdiction.

EPA will continue to work with Regions 2, 4 and 6 to address these hurricanes and will continue to provide information to the public as quickly as possible.

As EPA prepares to support FEMA and its local and state partners, it continues to focus its message on the importance of public safety.

EPA Approves Emergency Fuel Waivers for Texas and Georgia

WASHINGTON (August 29, 2017) – Following Hurricane Harvey’s landfall, Environmental Protection Agency (EPA) Administrator Scott Pruitt has approved emergency fuel waiver requests from the Texas Comptroller

and the Georgia Environmental Protection Division.

EPA has waived the highway diesel fuel red dye requirements to allow the use of non-road diesel fuel for on-highway vehicles involved in emergency response and disaster recovery in Texas as a result of Hurricane Harvey, through September 15.

EPA has also waived the requirement for low volatility gasoline for 13 counties in the Atlanta Metro Area, as a result of the disruption in the supply to that area caused by Hurricane Harvey. The waiver will allow the higher volatility fuel to be sold in the Atlanta area through September 15.

The waiver authority was exercised under the Clean Air Act and was granted by EPA Administrator Pruitt, in coordination with the U.S. Secretary of Energy Rick Perry. The requests were made by Texas Comptroller Glenn Hegar on behalf of Governor Greg Abbott and Georgia Environmental Protection Division Director Richard E. Dunn on behalf of Governor Nathan Deal.

As required by law, EPA and the Department of Energy (DOE) evaluated the situation and determined that granting a short-term waiver was consistent with the public interest. EPA and DOE are continuing to actively monitor the fuel supply situation as a result of Hurricane Harvey, and will act expeditiously if extreme and unusual supply circumstances exist in other areas.

To mitigate any impacts on air quality, the Clean Air Act provides strict criteria for when fuels waivers may be granted, and requires that waivers be limited as much as possible in terms of their geographic scope and duration.

Tate, please disregard the last email and attachment. I'm attaching the updated version here and pasting below. -Scott

Overview:

Date: Wednesday, August 2, 2017

Time of arrival: 10:00am Mountain time

Venue: Frasier Ranch - cow/calf and stocker operation

Street Address: 5727 Hwy 71, Woodrow, CO, 80757

Owner: Mark Frasier

Audience: 20-30 attendees (estimated)

- Agricultural stakeholders – ranchers, feedlot operators, dairies, farmers
- Members of Congress and/or staff
- County Commissioners

Background: He had EPA visit his ranch in 2015 during the WOTUS rollout when they promised it wouldn't impact agriculture and we know how that turned out. It will be great for the Administrator to do a repeat here except he's actually providing relief to Rural America.

Timeline:

10:00am: Introductions and gather at the hay barn

10:15am: Conversation between EPA and ag stakeholders

11:00pm: Tour of Frasier Ranch –

- Stock ponds
- Grazing cattle
- Stocker cattle

12:00pm: Lunch back at the homestead (table at the barn with cold cut sandwiches, chips, drinks)

1:00pm: Goodbyes and departure

Dress code: Dress for outdoor ranch tour – Jeans, boots, button-down shirt

Subject: FW: EPA's response to Harvey

Good afternoon—

I thought I would pass along the below message from Administrator Pruitt to EPA staff regarding the state of Texas. We will continue to work with our state partners in all affected areas.

Best.

Tate

Elizabeth Tate Bennett

Subject: EPA's response to Harvey

As you know, Harvey continues to devastate the state of Texas. The storm is still very dangerous, and the people in affected areas are experiencing tornados and catastrophic flooding. Effects will continue for the foreseeable future.

It is a top priority of the Federal Emergency Management Agency (FEMA) and our federal partners to work together to support authorities in the state of Texas and to protect the life and safety of those in impacted areas.

As many of you know, EPA has an organized emergency response program for responding to man-made and natural disasters and is positioned to support FEMA, state, local, and tribal partners. Headquarters' Emergency Operations Center (EOC) has been activated, and we are already deploying assets to support emergency response and aftermath flooding. The National Incident Management Assistance Team, consisting of highly skilled response personnel from across the Agency, has been activated and will arrive in Dallas by tomorrow.

I have been in regular contact with Region 6 and want to commend the staff there, along with the many others across the Agency, who are part of this hurricane response effort for their leadership and preparation. As of now, we have several EPA employees who have been evacuated from their homes, some with water damage to their homes and vehicles. As you can imagine, this is very hard on our community, and I continue to keep those affected by the storm in my thoughts and prayers.

The Agency is supporting the response effort in several ways:

- We're developing surface water sampling plans to address public health concerns regarding possible contaminants found in storm water. We will begin field sampling of flood waters as soon as conditions allow.
- Our drinking water and waste water staff are ready to deploy to offer technical assistance necessary to restore services as quickly as possible. These teams will visit drinking water and waste water facilities to determine functionality and provide technical assistance as needed. At the request of the State of Texas, EPA is deploying personnel to assist the Texas Commission on Environmental Quality's (TCEQ) Drinking Water and Waste Water Phone Bank located in Austin, Texas.
- Our Superfund Remedial Project Managers worked with site operators to secure the sites last week ahead of the storm. This week we will continue to work with site operators to get status updates, conduct rapid damage assessments, and determine if additional emergency cleanup activities are necessary.

- We will be working with TCEQ to determine where the Agency can best assist the state in contacting industrial sources along the Texas coast, most of which underwent organized shutdown of their operations in advance of the storm. We will initiate contact with sources located within the storm area to determine status and plans to resume operations, and we will closely monitor startup activities.
- We're also working with the states to provide fuel and refinery waivers to address any fuel supply issues.

Helping Region 6 to manage response efforts and focusing on the safety of those affected are our highest priorities. As rainfall continues, EPA is working with the Louisiana Department of Environmental Quality (LDEQ) to forecast any needs the state may have as a result of heavy rains and possible flooding.

This is one of those times when we must all be forward leaning. EPA has and will continue to work with our state partners to take care of people and continue to show our leadership to protect human health and the environment.

The response to the impacts of the storm will require a sustained and focused effort on the Agency's part. As we continue to integrate activities with the states and other federal response agencies, I want to thank all of you who are and will continue to monitor and respond to this emergency.

Sorry Scott – I realize everyone's time is valuable but it isn't possible for us to be there on the 2nd. Happy to explain offline. Our office has a newfound relationship with Commissioner Brown, and I'd be happy to explain it to him as well. We just moved an event with 60 farmers in Utah last week. If it no longer works, we appreciate everything you have done thus far and we can try another time.

Subject: RE: Frasier Ranch visit

We've got the commissioner of ag, as well as county commissioners change their schedules to be there Aug 2nd. 25 ranchers, farmers, and friends of agriculture have committed to be there for the event. Ship has left the port. Need you to push to make this happen Aug 2nd.

Subject: RE: Frasier Ranch visit

Tate, please disregard the last email and attachment. I'm attaching the updated version here and pasting below. -Scott

Overview:

Date: Wednesday, August 2, 2017

Time of arrival: 10:00am Mountain time

Venue: Frasier Ranch - cow/calf and stocker operation

Street Address: 5727 Hwy 71, Woodrow, CO, 80757

Owner: Mark Frasier

Audience: 20-30 attendees (estimated)

- Agricultural stakeholders – ranchers, feedlot operators, dairies, farmers
- Members of Congress and/or staff
- County Commissioners

Background: He had EPA visit his ranch in 2015 during the WOTUS rollout when they promised it wouldn't impact agriculture and we know how that turned out. It will be great for the Administrator to do a repeat here except he's actually providing relief to Rural America.

Timeline:

10:00am: Introductions and gather at the hay barn

10:15am: Conversation between EPA and ag stakeholders

11:00pm: Tour of Frasier Ranch –

- Stock ponds
- Grazing cattle
- Stocker cattle

12:00pm: Lunch back at the homestead (table at the barn with cold cut sandwiches, chips, drinks)

1:00pm: Goodbyes and departure

Dress code: Dress for outdoor ranch tour – Jeans, boots, button-down shirt

Subject: INQUIRY: Fall Industry Association and EPA OGC Dialogue Dates

Hello all:

I hope you have all had a great summer and are looking forward to a productive and bountiful fall season.

I am writing to determine whether you all would be interested and available to join the Office of General Counsel and our Regional Counsels for a follow up to our February conversation. It has been a busy last six months here at the Agency, and we have been awaiting the appointment of a General Counsel, and hoping to schedule a follow up dialogue with his/her presence. However, as the time continues without clear indications that will continue in the near term, we want to schedule another meeting so we don't lose momentum and we keep the lines of communication open. We would like to provide you with information on how we have divided up roles/responsibilities for our new management team, and introduce our newest political Deputy General counsels (Erik Baptist and David Fotouhi). As you may recall, you met Justin Schwab at our February open house. We also want to hear from you on the legal and policy issues that are important to you and your constituents.

- **Please let me know your availability for a noon meeting here at EPA on either September 27th or 28th by Friday, September 1.**

We will assess the date that works best for most and send out a meeting invitation with more specific information and instructions for signing into the building.

R

Subject: Industry Association and EPA OGC Dialogue (Video/Call in number: **Ex. 6**)

When: Wednesday, February 22, 2017 12:00 PM-1:00 PM (UTC-05:00) Eastern Time (US & Canada).

Where: 1200 Pennsylvania Ave. NW (William Jefferson Clinton Building), 4th Floor, Room 4045

External guests, please enter via our North side entrance. Once you have cleared security, someone will come down to escort you to the meeting location.

EPA Regional Counsels, to be connected via video, please use the same room as the Tuesday staff meetings. Thank you!
